						'G' (P/O Morris) after crossing the RHINE and on approach to the target was attached by an ME 110 and had to jettison during evasive action at 14,000 feet at 0140 hours. The e/a was sighted at 0135 hours at 14,000 feet east of RUHR 500 feet below and at rear proceeding in same direction. E/a came up and fired bursts causing no damage. The rear gunner relied with three bursts, tracers just missing tail of e/a. Evasive action was taken after pursuit by e/a lasting five minutes. Pilot put ship into a dive and he was shaken off. Three balloons sighted at 14,000 feet in the OBERHAUSEN area. 'C' reported a series of white lights approximately twenty to thirty miles apart. Similar lights were seen in area south of RUHR bounded by DUSSELDORF WUPPERTAL ESSEN and DUISBURG at least seven groups were counted each consisting of triangles five miles apart and which included a single static white light a yellow or orange light at the apex and a white light at the third point of a triangle the lights being about one to two miles apart. The latter two lights showed only momentarily as if to indicate the direction of a plotted aircraft. 'J', 'C', 'O' and 'H' each took photos with bombing but not yet plotted.

'J', 'O', 'M', 'D', 'G' carried three packages of G33 nickles, remainder three packages G34. There is little doubt that six of the captains managed to reach target area but the terrific opposition intense S/L glare and ground haze prevented any identification of ground features and bombing was carried out with navigational aid. Very little evidence was seen of any weight of attack. Although conditions made observation next to impossible all captains were engaged in taking the most evasive action. 'J' and 'O' having to lose height from 19,000 to 8,000 feet and from 20,000 feet to 900 feet in the target area. Five a/c bombed target area but one could not regain height in accordance with time limit and bombed unidentified area. One a/c returned early with engine trouble twelve minutes after take off. 'B', 'H' and 'U' are missing. 'J' (S/Ldr. Between 0100 hours and 0140 hours in ESSEN area saw two a/c shot down by flak.
