All 7 Lancasters attacked Essen, dropping 8 IR TI Green, 6 TI Green, 7x4000 HC, 42x1000 MC 4x5000 MC and 2520x4 lb. incendiaries between 21.59 and 22.13 hrs. from 19500/18000 ft. Weather 10/10 strater cu. tops 5/15,000 ft. vis. good. Cloud conditions made it impossible to see TI's burning on the ground. Six A/C bombed the glow of Red TI's and the remaining A/C the reflection of Green TI's. The attack opened well on time, the first Red TI cascading at 21.55 hrs. Other Reds were reported cascading at 21.58 and 22.08 hrs. The reflections from these Reds suggested exceptionally good marking and were well backed up by Greens, three of which were reported cascading at 22.01.30, 22.05 and 22.12.30 hrs. No detailed observation of results was possible due to the prevailing cloud, but most crews thought the attack to be well concentrated. Slight to moderate H/F in barrage form was encountered, and the glow of S/L's was seen through cloud.
